PROFESSIONAL SUMMARY

SDET with 4+ years designing and owning test automation architecture across Web, Mobile, and API layers in Agile SaaS environments. Built and scaled Playwright/Selenium frameworks (POM, data-driven, hybrid) from the ground up, integrated them into Jenkins/GitLab/GitHub Actions CI/CD pipelines, and cut regression cycle time by 40% while automating 200+ scenarios. Strong engineering fundamentals in TypeScript, Python, and SQL, with hands-on ownership of payment gateway and financial workflow test coverage across a high-compliance healthcare SaaS platform.

CORE TECHNICAL SKILLS

Automation & Frameworks: Playwright (TypeScript/Python), Selenium WebDriver, Pytest, Page Object Model, Data-Driven & Hybrid Frameworks, BDD, Cross-Browser & Parallel Execution

CI/CD & DevOps: Jenkins, GitLab CI, GitHub Actions, Docker, Git, Allure Reports - pipeline design & test-suite integration

API & Backend Testing: Postman (automation scripts, collections, runners), REST API Testing, Swagger/OpenAPI, JSON/XML & schema validation

Performance Engineering: JMeter, Artillery, Load & Stress Testing, Performance Monitoring

Programming & Data: Python, JavaScript, TypeScript, SQL, Shell Scripting, MySQL (Joins, Subqueries, data verification)

Domain Expertise: Payment Gateway Testing, Cron Job Validation, Financial Workflow Testing, Healthcare SaaS

Process & Methodology: Agile, Scrum, Test Planning, Test Strategy, Quality Engineering, Regression Testing, Functional Testing, Defect Management (Jira)

PROFESSIONAL EXPERIENCE

Senior QA Engineer - SDET | Bridging Healthcare Technologies Pvt. Ltd. | Jan 2024 - Nov 2025

- Designed and owned a Playwright + Selenium automation architecture from scratch, automating 200+ UI & API test scenarios and cutting regression effort by 40% - promoted into the role on the strength of this framework work.
- Engineered CI/CD test integration across Jenkins and GitLab CI, embedding automated suites directly into the release pipeline; ran load and performance testing with JMeter and Artillery.
- Established mandatory automated QA sign-off gates before every release, reducing production incidents on critical workflows.
- Mentored junior QA engineers on automation architecture, coding standards, and framework best practices.
- Built and maintained end-to-end automated coverage for Payment Gateway integrations - transaction flows, failure scenarios, and edge cases.
- Automated validation of Cron Job executions and financial workflows to guarantee accurate scheduling and business-logic integrity.
- Awarded Best Employee of the Company and Best QA for early critical-defect detection through automation.

QA Engineer | *Bridging Healthcare Technologies Pvt. Ltd.* | Mar 2022 - Dec 2023

- Led functional, regression, and UAT testing across Web and Mobile for a healthcare financing platform, laying the groundwork later automated into the Playwright suite.
- Built Postman automation scripts using global, environment, and collection variables to validate large data sets, business logic, and response accuracy.
- Used MySQL Joins and Subqueries to validate backend data integrity, feeding automated data-verification checks into the test suite.
- Designed and maintained structured test cases (positive, negative, edge-case) and managed the full defect lifecycle in Jira.

Associate QA Engineer | *Bridging Healthcare Technologies Pvt. Ltd.* | Dec 2021 - Feb 2022

- Promoted to QA Engineer within 3 months for rapidly mastering QA processes and delivering quality output from day one.

PROJECTS

Denefits - Web & Mobile Application | github.com/GurAutoTest | 2023 - Present

- Owned end-to-end QA and automation for major features from development through live release across Web and Mobile.
- Automated sign-off testing for all new features pre-production, ensuring zero critical defects reached production.
- Built automated coverage for the Payment Plans feature - workflows, edge cases, and integration scenarios.
- Supported INR 1,00,000+ in delivered contracts through stable, automation-backed production releases.

ACHIEVEMENTS

- Awarded Best Employee of the Company
- Awarded Best QA for early defect detection
- Promoted Associate QA to Senior QA in under 4 years
- Reduced regression effort by 40% through end-to-end test automation architecture

EDUCATION

MBA (IT Management) - Chandigarh University - 2021

MCA - Lovely Professional University - 2019

BCA - Lovely Professional University - 2017
